

Highly motivated, results-driven engineering undergraduate pursuing a career as a Non-IT Professional. Competent at overseeing core business operations, optimizing corporate frameworks, and establishing strong workflow strategies to cultivate sustainable organizational growth. A dedicated communicator who excels at organizing complex data, maintaining compliance standards, and managing comprehensive customer relations to maximize workplace efficiency.

CORE COMPETENCIES, HARD & SOFT SKILLS

- **Professional Soft Skills:** Problem Solving, Critical Thinking, Better Communication, Adaptability, Maintaining Workflows, Time Management, Team Collaboration, Organizing Schedules, Coordinating Cross-functional Teams
- **Business Operations & Continuity:** Core Business Execution, Business Operations, Operational Efficiency, Business Continuity Planning, Administration, Infrastructure Management, Serve as Client Liaison
- **Customer Support & Relations:** Customer Support, Customer Relations, Chat & Email Support Protocols, Phone Call Support, Customer Data Handling, BPO Process Workflows
- **Tracking Systems & Data Entry:** Data Entry Execution, Data Systems Management, Customer Tracking Systems, Applicant Tracking Systems (ATS), Record Maintaining & Screening
- **Technical Support & Infrastructure:** Technical Support, Hardware Troubleshooting, Network Routing Basics, Laboratory Configurations, Systems Maintenance, Component Alignment

WORK EXPERIENCE

PSI Logit LLP July 2024 – August 2024
Web & Technical Operations Intern (Non-IT) Remote / On-site

- Assumed core responsibilities to execute day-to-day administrative functions supporting business operations.
- Managed a high volume of operational workflows, prioritizing data verification to satisfy strict corporate timelines.
- Validated system behaviors and assessed platform accessibility metrics to optimize infrastructure management.
- Utilized specialized corporate software to review customer interface modules and end-user configurations.
- Contributed to organizational growth by managing the daily review and documentation of process reports.

PROJECTS & EXPERIENCES

Customer Interface & E-Commerce Asset Management

- Led layout alignment of an e-commerce display, taking charge of evaluating user browsing features.
- Managed log records, verified pricing sheets, and executed structural database data entry tasks with precision.
- Optimized backend data systems execution to completely minimize text layout variance across portals.

College Infrastructure & Network Laboratory Operations Support

- Spearheaded an infrastructure project by coordinating with technical teams to organize a lab configuration drive.
- Handled the deployment and structured routing of local Ethernet cable setups for stable system connectivity.
- Executed hardware troubleshooting procedures to diagnose errors and improve laboratory operational efficiency.

ADDITIONAL EXPERIENCE & SKILLS EXTENSION

- **Administrative Coordinating:** Organized regional student event schedules and coordinated meeting spaces.
- **Customer Operations:** Managed high-volume customer inquiries via phone channels during institutional festivals.
- **Recruitment Logistics:** Supported human resources executives by handling primary resume screening logs.
- **Service Level Management:** Monitored project metrics to ensure alignment with service level agreements (SLAs).

EDUCATION

Kings College of Engineering 2021 – 2025
Bachelor of Engineering (B.E.) – Computer Science and Engineering CGPA: 7.95 / 10.0

Government Higher Secondary School 2019 – 2021
Pre-University Course (PUC) / Higher Secondary Education Score: 81.66%

PROFESSIONAL CERTIFICATIONS

- **DevOps Basics & Workflow Systems** – Naan Mudhalvan Scheme
- **Advanced Professional Productivity Tools (MS Office Suite)**
